

## APRIL FLUID SALE

**Would you like the cheap, the average, or the high quality air today?**

Choosing the right haze, fog, snow, bubble, and foam fluid is just like choosing the air you breath. With that in mind, CITC can put your mind ease because all of our fluids are high quality. Our water undergoes reverse osmosis so that it is as pure as possible. Our chemicals are food grade and all are made in the U.S.A. CITC's fluids have been tested by Envion Lab which was chosen by ESTA, and have been found to be completely safe for use. *CHOOSE PURE. CHOOSE CITC.*
