Press Release

Broadway's Hairspray Tour is Using Fantasy FX!

CITC's Fantasy FX is odorless, harmless, and perfect for stage and screen! It comes with either the regular "hairspray" type nozzle (shown) or the auto-spray nozzle, where you can click it down for continuous spray and click up to stop the spray. The auto-spray comes out vertical instead of horizontal. This product is also available with the "Poof" label for Halloween or the "Fogger of the Bride" label for weddings.

"True Grit (2010)" Uses SnoBiz!

CITC's award winning SnoBiz was used in the movie, **"True Grit (2010)"** as well as in the current **Harry Potter and Narnia** traveling Exhibitions. It's fluffy, white, three-dimensional flakes, and the fact that it has been tested and found to be completely harmless to the environment (it is biodegradable), makes it perfect for theatre and film companies worldwide. These flakes don't flutter like plastic or paper, they float like real snow!

Harrah's Miracle on Fulton Street, New Orleans
Uses the Little Blizzard Snow Machines!

Last Christmas, Harrahs New Orleans took full advantage of the fact that the Little Blizzard's falling snow is quiet enough not to be heard over the music and evaporates quickly without leaving a residue. Now *that's* magic!

"Smurfs" Movie (2011) "chose CITC's Bubble Max!

No worries about filling the bubble machine! The Bubble Max Auto-Fill saves time, labor, and produces constant fun! Bubble Science Formula fluid makes 25X the bubbles. They are stronger, reflect colors better, and last longer! (As seen in 4D Cinema's for Spongebob Squarepants)
