

WINDICATOR

Shows air movement

Anywhere the air moves is so difficult to see it's direction.

In comes Windicator.
This remarkable product makes seeing air movement a snap.

Just place it in position and lock down the top to get a good view of the area that will be covered when using the Bird Buffer.

Follow the advice of professionals and see where the invisible vapor from the Bird Buffer will go.

Keep your eye on corners, around buildings and areas that you would not expect a change.

This can of spray fog will last over 5 full minutes. You can use it 3-4 times in different areas to measure, photograph and determine the best placement of the Bird Buffer will be the most effective.
