[CITC Special Effects Equipment is Used in "Superman Returns"](#)

[CITC Creates a New Snow Fluid for Freezing Weather](#)

CITC has been awarded the patent for their Super Foam Dome machine. Safe, dependable, and loads of fun, the Super Foam Dome delivers a foam so dry, that it is very light and fluffy. This means very little residue left for cleanup at the end of the event! It now delivers 500 cfm. It will fill a 20 X 20 X 6' area in less than 6 minutes. This foam is so light, that instead of just laying on the floor, the foam will also float over the top of people. CITC includes a safety banner, "Keep Foam Fun."

Also available is the new "Anti-Foam" fluid for immediately getting rid of foam. It reduces the foam to water (if there's any left). Anti-Foam fluid also keeps the foam from getting foamy again when vacuumed.

COOL STUFF THAT'S SHOW TUFF®

CITC has now retained a registered trademark for the slogan, "Cool Stuff That's Show Tuff!®." The slogan was created by Stephany Crawford, our VP in charge of marketing and advertising. Look for our new shirts at LDI that has this slogan. Visit our booth to be in a drawing for a free, "Cool Stuff That's Show Tuff!" T-Shirt! Or call and get your order now at 1-888-786-2472.

CITC special effects equipment was used in the latest "Superman Returns". While shooting in Australia, *Martin of StanMart Films* used truckloads of SnoBiz® for set snow, the Little Blizzard® for falling snow, the HazeMax for water-based haze, and the quiet Starhazer II haze machine for long lasting oil-based haze. CITC received an award at LDI for best scenic effect for SnoBiz®.

CITC Special Effects Equipment created a new falling snow fluid called LB-32 (0), specifically for freezing weather. Freezing temperatures which used to be a problem for snow machines are now a thing of the past. For the first time, now the **quietest** snow machine in the world, the Little Blizzard SP, is able to make a good falling snow effect *even in freezing weather*. This fluid will work in all snow machines; however the effect is best when used with the Little Blizzard® and Little Blizzard® SP DMX
