

SNOW EFFECTS

THE QUIETEST SNOW MACHINE IN THE WORLD

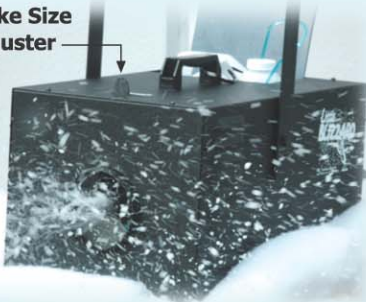

Use with new "Super Extra Dry" Little Blizzard® Fluid and Hurricane II™ fan for best snow effect without residue.

LITTLE BLIZZARD® SP/DMX

100250, 100246* without DMX
100242, 100247* with DMX

The Little Blizzard® SP/DMX is whisper quiet and is a high quality, industry standard. This unit includes all of the features below and is our most popular model.

Flake Size Adjuster

DRIEST, LONG-FLOATING FLAKES

- DMX address, in/out 5-pin XLR
- Remote volume on/off 5-pin XLR in/out
- Safety fused
- 2-speed switch
- Hanging bracket

LITTLE BLIZZARD® DMX

100241, 100246*

The Little Blizzard®/DMX can run continuously without overheating. It has insulation for quietness, a flake size adjustment paddle, two-speed motor, remote control and DMX on-board. Full digital volume control adds precision to DMX or remote control with 25' cord (7.62m). The round opening increases output 20%. Heavy-duty powder coating reduces sound and rust. Includes mounting bracket. (See Dream Team™ on page 2 for best floating snow effect that evaporates on contact).

SNOW DANCING!

Blizzard an audience! For best coverage, pair any Little Blizzard® up with our Hurricane II™ fan to achieve flying snow from 80-100 feet (25m-30m), depending on the fluid chosen.

FLAKES DISAPPEAR. NO RESIDUE

When used as directed.

*230 V

Machines have one year limited warranty as long as CITC's fluids used. See Specifications located at back of catalog
